

Many Critical Questions Arise, Prior to Construction...

What does the soil look like below the ground? How will the soil react to load? Do we have groundwater? Does the earth change as we look deeper?

The answer: There is only one way to find out; start drilling!

Working Quickly & Safely

Terra Contracting provides clients and customers drilling services with:

- ▶ Three truck mounted and two track mounted geotechnical drill rigs
- ▶ Highly skilled and knowledgeable drillers to achieve necessary depths and provide earth samples for the entire depth of the drilling operation

Providing Essential Information

Terra's drilling team generates information for engineers and geologists via:

- ▶ Installation of groundwater monitoring wells for environmental and geotechnical applications
- ▶ Soil sampling devices taken with SPT, California sampler or bags

End-to-End Site Management

Terra has extensive experience working within the public right-of-way. In addition to your drilling project, Terra can handle the end-to-end site management, including:

- ▶ Traffic control plan design and submittal
- ▶ Asphalt repair
- ▶ Inspection coordination
- ▶ Asphalt coring
- ▶ Right-of-way entry permits
- ▶ Hole backfill

We remove all the hassles associated with project coordination and allow our clients and customers to focus on what they do best. This level of experience and service makes Terra Drilling your one-stop drilling partner.

Call Terra Drilling to learn more or quote your next drilling project needs.

Vault Repair

Experts in the repair of underground vaults housing power lines, telephone lines, storm drains and more. The proprietary repair process is extremely cost-effective and efficient, saving time, money and downtime in high traffic public spaces.

- ▶ *No excavation required*
- ▶ *Minimal traffic control reduces cost*
- ▶ *No removal of cables / lines necessary*
- ▶ *New walls cure to more than 10,000 PSI strength*

*Additional applications include: elevator shafts, underground parking structures, basements and more.

Pipeline Systems

Terra is a leader in the underground utility industry, serving major Utility Providers since 1994.

- ▶ *Water / Sanitary Sewer / Storm Sewer*
- ▶ *Natural Gas*
- ▶ *Power / Telephone / CATV*
- ▶ *Street Lighting / Site Lighting / Traffic Signals*

Incorporating the highest standards for quality control and safety measures allows Terra to maintain production and meet schedules. Terra's area of expertise: **HIGH-RISK PROJECTS.**

Structural Resurfacing

Specializing in repair of freeways, sidewalks, curbs and gutters, and revamping pedestrian walkways to ADA standards.

Use of various products such as:

FLEXKIT, Sterling Surface Systems and polyaspartic coatings

- ▶ *Fast-curing products allow for traffic to resume within 1 hour of application*
- ▶ *Virtually unlimited color and decorative options*

Featured project: On Fremont Street, our crews worked section by section to install a polymer product (an alternative to the epoxy originally installed), that cures faster, stronger and **WILL NOT YELLOW.**
